

CHAPTER 148

ILLICIT DISCHARGE INTO STORM WATER DRAINAGE SYSTEM

148.01 Purpose	148.12 Watercourse Protection
148.02 Definitions	148.13 Notification of Spills
148.03 Applicability	148.14 Enforcement
148.04 Responsibility for Administration	148.15 Appeal of Notice of Violation
148.05 Ultimate Responsibility	148.16 Enforcement Measures After Appeal
148.06 Prohibition of Illegal Discharges	148.17 Cost of Abatement of the Violation
148.07 Prohibition of Illicit Connections	148.18 Injunctive Relief
148.08 Suspension of MS4 Access	148.19 Compensatory Action
148.09 Industrial or Construction Activity Discharges	148.20 Violations Deemed a Public Nuisance
148.10 Monitoring of Discharges	148.21 Criminal Prosecution
148.11 Requirement to Use Best Management Practices	148.22 Remedies Not Exclusive

148.01 PURPOSE. The purpose of this chapter is to provide for the health, safety, and general welfare of the citizens of the City through the regulation of non-storm water discharges to the storm drainage system to the maximum extent practicable as required by Federal and State law. This chapter establishes methods for controlling the introduction of pollutants into the municipal separate storm sewer system (MS4) in order to comply with requirements of the National Pollutant Discharge Elimination System (NPDES) permit process. The objectives of this chapter are:

1. To regulate the contribution of pollutants to the municipal separate storm sewer system (MS4) by storm water discharges by any user.
2. To prohibit illicit connections and discharges to the municipal separate storm sewer system.
3. To establish legal authority to carry out all inspection, surveillance, and monitoring procedures necessary to ensure compliance with this chapter.

148.02 DEFINITIONS. For the purposes of this chapter, the following terms are defined:

1. "Authorized enforcement agency" means the Evansdale Building Inspector or said official's designees.
2. "Best management practices" (BMPs) means schedules of activities, prohibitions of practices, general good housekeeping practices, pollution prevention and educational practices, maintenance procedures, and other management practices to prevent or reduce the discharge of pollutants directly or indirectly to storm water, receiving waters, or storm water conveyance systems. BMPs also include treatment practices, operating procedures, and practices to control site runoff, spillage or leaks, sludge or water disposal, or drainage from raw materials storage.
3. "Building Inspector" means the City employee with primary responsibility for administration and enforcement of this chapter.
4. "Clean Water Act" means the Federal Water Pollution Control Act (33 U.S.C. §1251 et seq.), and any subsequent amendments thereto.
5. "Construction activity" means activities subject to NPDES construction permits. These include construction projects resulting in land disturbance of one acre or more. Such activities include but are not limited to clearing and grubbing, grading, excavating, and demolition.

6. “Hazardous materials” means any material, including any substance, waste, or combination thereof, which because of its quantity, concentration, or physical, chemical, or infectious characteristics, may cause, or significantly contribute to, a substantial present or potential hazard to human health, safety, property, or the environment when improperly treated, stored, transported, disposed of, or otherwise managed.
7. “Illegal discharge” means any direct or indirect non-storm water discharge to the storm drain system, except as exempted in Section 148.06 of this chapter.
8. “Illicit connection” means either of the following:
 - A. Any drain or conveyance, whether on the surface or subsurface, which allows an illegal discharge to enter the storm drain system, including but not limited to any conveyances which allow any non-storm water discharge, including sewage, process wastewater, and wash water to enter the storm drain system and any connections to the storm drain system from indoor drains and sinks, regardless of whether said drain or connection had been previously allowed, permitted, or approved by an authorized enforcement agency; or
 - B. Any drain or conveyance connected from a commercial or industrial land use to the storm drain system which has not been documented in plans, maps, or equivalent records and approved by an authorized enforcement agency.
9. “Industrial activity” means activities subject to NPDES industrial permits as defined in 40 CFR, Section 122.26(b)(14).
10. “National Pollutant Discharge Elimination System (NPDES) storm water discharge permit” means a permit issued by EPA [or by a State under authority delegated pursuant to 33 USC §1342 (b)] that authorizes the discharge of pollutants to waters of the United States, whether the permit is applicable on an individual, group, or general area-wide basis.
11. “Non-storm water discharge” means any discharge to the storm drain system that is not composed entirely of storm water.
12. “Pollutant” means anything which causes or contributes to pollution. Pollutants may include (but are not limited to): paints, varnishes, and solvents; oil and other automotive fluids; non-hazardous liquid and solid wastes and yard wastes; refuse, rubbish, garbage, litter, or other discarded or abandoned objects, ordinances, and accumulations, so that same may cause or contribute to pollution; floatables; pesticides, herbicides, and fertilizers; hazardous substances and wastes; sewage, fecal coli form and pathogens; dissolved and particulate metals; animal wastes; wastes and residues that result from constructing a building or structure; and noxious or offensive matter of any kind.
13. “Premises” means any building, lot, parcel of land, or portion of land, whether improved or unimproved, including adjacent sidewalks and parking strips.
14. “Storm drainage system” means publicly owned facilities by which storm water is collected and/or conveyed, including but not limited to any roads with drainage systems, municipal streets, gutters, curbs, inlets, piped storm drains, pumping facilities, retention and detention basins, natural and human-made or altered drainage channels, reservoirs, and other drainage structures.
15. “Storm water” means any surface flow, runoff, and drainage consisting entirely of water from any form of natural precipitation, and resulting from such precipitation.
16. “Storm Water Pollution Prevention Plan” means a document which describes the best management practices and activities to be implemented by a person or business to identify

sources of pollution or contamination at a site and the actions to eliminate or reduce pollutant discharges to storm water, storm water conveyance systems, and/or receiving waters to the maximum extent practicable.

17. “Wastewater” means any water or other liquid, other than uncontaminated storm water, discharged from a facility.

148.03 APPLICABILITY. This chapter applies to all water entering the storm drain system, generated on any developed and undeveloped lands, unless explicitly exempted by an authorized enforcement agency.

148.04 RESPONSIBILITY FOR ADMINISTRATION. The City Building Inspector, with the assistance as necessary of the Street Department, the Police Department, the City Attorney, and contracted civil engineers, shall administer, implement, and enforce the provisions of this chapter.

148.05 ULTIMATE RESPONSIBILITY. The standards set forth herein and promulgated pursuant to this chapter are minimum standards; therefore, this chapter does not intend or imply that compliance by any person will ensure that there will be no contamination, pollution, or unauthorized discharge of pollutants.

148.06 PROHIBITION OF ILLEGAL DISCHARGES. No person shall discharge or cause to be discharged into the municipal storm drain system or watercourses any materials, including (but not limited to) pollutants or waters containing any pollutants that cause or contribute to a violation of applicable water quality standards, other than storm water. The commencement, conduct, or continuance of any illegal discharge to the storm drain system is prohibited except as described as follows:

1. The following discharges are exempt from discharge prohibitions established by this chapter: water line flushing or other potable water sources, landscape irrigation or lawn watering, diverted stream flows, rising ground water, ground water infiltration to storm drains, uncontaminated pumped ground water, foundation or footing drains (not including active groundwater dewatering systems), crawl space pumps, air conditioning condensation, springs, non-commercial washing of vehicles, natural riparian habitat or wet-land flows, swimming pools (if de-chlorinated – typically less than one PPM chlorine), firefighting activities, and any other water source not containing pollutants.
2. Discharges specified in writing by the authorized enforcement agency as being necessary to protect public health and safety.
3. Dye testing is an allowable discharge, but requires a verbal notification to the authorized enforcement agency prior to the time of the test.
4. The prohibition shall not apply to any non-storm water discharge permitted under an NPDES permit, waiver, or waste discharge order issued to the discharger and administered under the authority of the Federal Environmental Protection Agency, provided that the discharger is in full compliance with all requirements of the permit, waiver, or order and other applicable laws and regulations, and provided that written approval has been granted for any discharge to the storm drain system.

148.07 PROHIBITION OF ILLICIT CONNECTIONS.

1. The construction, use, maintenance, or continued existence of illicit connections to the storm drain system is prohibited.

2. This prohibition expressly includes, without limitation, illicit connections made in the past, regardless of whether the connection was permissible under law or practices applicable or prevailing at the time of connection.

3. A person is considered to be in violation of this chapter if the person connects a line conveying sewage to the MS4, or allows such a connection to continue.

148.08 SUSPENSION OF MS4 ACCESS.

1. Suspension Due to Illicit Discharges in Emergency Situations. The Building Inspector may, without prior notice, suspend MS4 discharge access to a person when such suspension is necessary to stop an actual or threatened discharge which presents or may present imminent and substantial danger to the environment, or to the health or welfare of persons, or to the MS4 or waters of the United States. If the violator fails to comply with a suspension order issued in an emergency, the Building Inspector may take such steps as deemed necessary to prevent or minimize damage to the MS4 or waters of the United States, or to minimize danger to persons.

2. Suspension Due to the Detection of Illicit Discharge. Any person discharging to the MS4 in violation of this chapter may have their MS4 access terminated if such termination would abate or reduce an illicit discharge. The Building Inspector will notify a violator of the proposed termination of its MS4 access. The violator may petition the Building Inspector for a reconsideration and hearing.

A person commits an offense if the person reinstates MS4 access to premises terminated pursuant to this section, without the prior approval of the Building Inspector.

148.09 INDUSTRIAL OR CONSTRUCTION ACTIVITY DISCHARGES. Any person subject to an industrial or construction activity NPDES storm water discharge permit shall comply with all provisions of such permit. Proof of compliance with said permit may be required in a form acceptable to the Building Inspector prior to the allowing of discharges to the MS4.

148.10 MONITORING OF DISCHARGES. This section applies to all facilities that have storm water discharges associated with industrial activity, including construction activity.

1. The Building Inspector shall be permitted to enter and inspect facilities subject to regulation under this chapter as often as may be necessary to determine compliance with this chapter. If a discharger has security measures in force which require proper identification and clearance before entry into its premises, the discharger shall make the necessary arrangements to allow access to representatives of the Building Inspector.

2. Facility operators shall allow the Building Inspector ready access to all parts of the premises for the purposes of inspection, sampling, examination, and copying of records that must be kept under the conditions of an NPDES permit to discharge storm water, and the performance of any additional duties as defined by State and Federal law.

3. The Building Inspector shall have the right to set up on any permitted such devices as are necessary in the opinion of the Building Inspector monitoring and/or sampling of the facility's storm water discharge.

4. The Building Inspector has the right to require the discharger to install monitoring equipment as necessary. The facility's sampling and monitoring equipment shall be maintained at all times in a safe and proper operating condition by the discharger at its own expense. All devices used to measure storm water flow and quality shall be calibrated to ensure their accuracy.

5. Any temporary or permanent obstruction to safe and easy access to the facility to be inspected and/or sampled shall be promptly removed by the operator at the written or oral request

of the Building Inspector and shall not be replaced. The costs of clearing such access shall be borne by the operator.

6. Unreasonable delays in allowing the Building Inspector access to a permitted facility is a violation of a storm water discharge permit and of this chapter. A person who is the operator of a facility with a NPDES permit to discharge storm water associated with industrial activity commits an offense if the person denies the Building Inspector reasonable access to the permitted facility for the purpose of conducting any activity authorized or required by this chapter.

7. If the Building Inspector has been refused access to any part of the premises from which storm water is discharged, and said official is able to demonstrate probable cause to believe that there may be a violation of this chapter, or that there is a need to inspect and/or sample as part of a routine inspection and sampling program designed to verify compliance with this chapter or any order issued hereunder, or to protect the overall public health, safety, and welfare of the community, then the Building Inspector may seek issuance of a search warrant from any court of competent jurisdiction.

148.11 REQUIREMENT TO USE BEST MANAGEMENT PRACTICES. The Building Inspector will adopt requirements identifying best management practices for any activity, operation, or facility which may cause or contribute to pollution or contamination of storm water, the storm drain system, or waters of the United States. The owner or operator of a commercial or industrial establishment shall provide, at said owner's expense, reasonable protection from accidental discharge of prohibited materials or other wastes into the municipal storm drain system or watercourses through the use of these structural and non-structural BMPs. Further, any person responsible for a property or premises, which is, or may be, the source of an illicit discharge, may be required to implement, at said person's expense, additional structural and non-structural BMPs to prevent the further discharge of pollutants to the municipal separate storm sewer system. Compliance with all terms and conditions of a valid NPDES permit authorizing the discharge of storm water associated with industrial activity, to the extent practicable, shall be deemed compliance with the provisions of this section. These BMPs shall be part of a storm water pollution prevention plan (SWPP) as necessary for compliance with requirements of the NPDES permit.

148.12 WATERCOURSE PROTECTION. Every person owning property through which a watercourse passes (or such person's lessee) shall keep and maintain that part of the watercourse within the property free of trash, debris, excessive vegetation, and other obstacles that would pollute, contaminate, or significantly retard the flow of water through the watercourse. In addition, the owner or lessee shall maintain existing privately owned structures within or adjacent to a watercourse, so that such structures will not become a hazard to the use, function, or physical integrity of the watercourse.

148.13 NOTIFICATION OF SPILLS. Notwithstanding other requirements of law, as soon as any person responsible for a facility or operation, or responsible for emergency response for a facility or operation has information of any known or suspected release of materials which are resulting or may result in illegal discharges or pollutants discharging into storm water, the storm drain system, or waters of the United States, said person shall take all necessary steps to ensure the discovery, containment, and cleanup of such release. In the event of such a release of hazardous materials, said person shall immediately notify emergency response agencies of the occurrence via emergency dispatch services. In the event of a release of nonhazardous materials, said person shall notify the Building Inspector in person or by phone or facsimile no later than the next business day. Notifications in person or by phone shall be confirmed by written notice addressed and mailed to the Building Inspector within three business days of the phone notice. If the discharge of prohibited materials emanates from a commercial or industrial establishment, the owner or operator of such establishment shall also retain an on-site written record of the discharge and the actions taken to prevent its recurrence. Such records shall be retained for at least three years.

148.14 ENFORCEMENT. Whenever the Building Inspector finds that a person has violated a prohibition or failed to meet a requirement of this chapter, the Building Inspector may order compliance by written notice of violation to the responsible person. Such notice may require, without limitation:

1. The performance of monitoring, analyses, and reporting;
2. The elimination of illicit connections or discharges;
3. Violating discharges, practices, or operations shall cease and desist;
4. The abatement or remediation of storm water pollution or contamination hazards and the restoration of any affected property;
5. Payment of a fine to cover administrative and remediation costs; and
6. The implementation of source control or treatment BMPs.

If abatement of a violation and/or restoration of affected property is required, the notice shall set forth a deadline within which such remediation or restoration must be completed. Said notice shall further advise that, should the violator fail to remediate or restore within the established deadline, the work will be done by a designated governmental agency or a contractor and the expense thereof shall be charged to the violator.

148.15 APPEAL OF NOTICE OF VIOLATION. Any person receiving a Notice of Violation may appeal the determination of the Building Inspector. The notice of appeal must be received within seven days from the date of the Notice of Violation. Hearing on the appeal before the appropriate authority shall take place within 15 days from the date of receipt of the notice of appeal. The decision of the municipal authority shall be final.

148.16 ENFORCEMENT MEASURES AFTER APPEAL. If the violation has not been corrected pursuant to the requirements set forth in the Notice of Violation, or in the event of an appeal within seven days of the decision of the municipal authority upholding the decision of the Building Inspector, then representatives of the Building Inspector shall enter upon the subject private property and are authorized to take any and all measures necessary to abate the violation and/or restore the property. It is unlawful for any person, owner, agent, or person in possession of any premises to refuse to allow the government agency or designated contractor to enter upon the premises for the purposes set forth above.

148.17 COST OF ABATEMENT OF THE VIOLATION. Within 14 days after abatement of the violation, the owner of the property will be notified of the cost of abatement, including administrative costs. The property owner may file a written protest objecting to the amount of the assessment within 14 days. If the amount due is not paid within a timely manner as determined by the decision of the municipal authority or by the expiration of the time in which to file an appeal, the charges shall become a special assessment against the property and shall constitute a lien on the property for the amount of the assessment. Any person violating any of the provisions of this chapter shall become liable to the City by reason of such violation. The liability shall be paid in not more than 12 equal payments. Interest at the rate of four percent per annum shall be assessed on the balance beginning on the 31st day following discovery of the violation.

148.18 INJUNCTIVE RELIEF. It is unlawful for any person to violate any provision or fail to comply with any of the requirements of this chapter. If a person has violated or continues to violate the provisions of this chapter, the Building Inspector may petition for a preliminary or permanent injunction restraining the person from activities which would create further violations or compelling the person to perform abatement or remediation of the violation.

148.19 COMPENSATORY ACTION. In lieu of enforcement proceedings, penalties, and remedies authorized by this chapter, the Building Inspector may impose upon a violator alternative compensatory actions, such as storm drain stenciling, attendance at compliance workshops, creek cleanup, etc.

148.20 VIOLATIONS DEEMED A PUBLIC NUISANCE. In addition to the enforcement processes and penalties provided, any condition caused or permitted to exist in violation of any of the provisions of this chapter is a threat to public health, safety, and welfare and is declared and deemed a nuisance, and may be summarily abated or restored at the violator's expense, and/or a civil action to abate, enjoin, or otherwise compel the cessation of such nuisance may be taken.

148.21 CRIMINAL PROSECUTION. Any person who has violated or continues to violate this chapter shall be liable to criminal prosecution to the fullest extent of the law. Each day in which a violation shall continue shall be deemed a separate offense. The Building Inspector may recover all attorneys' fees, court costs, and other expenses associated with enforcement of this chapter, including sampling and monitoring expenses.

148.22 REMEDIES NOT EXCLUSIVE. The remedies listed in this chapter are not exclusive of any other remedies available under any applicable Federal, State, or local law and it is within the discretion of the Building Inspector to seek cumulative remedies.
